Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at TestInside and update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to <http://www.TestInside.com>
2. Log in the **Member Center**
3. The latest versions of all purchased products are downloadable from here. Just click the links.

Feedback

If you spot a possible improvement then please let us know. We always interested in improving product quality.

Feedback should be send to sales(at)TestInside.com. You should include the following: Exam number, version, page number, question number, and your login Account.

Our experts will answer your mail promptly.

Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact sales(at)TestInside.com.

1. Examine the code below.

```
FUNCTION check_window RETURN VARCHAR2 IS
BEGIN
    RETURN (GET_VIEW_PROPERTY(GET_ITEM_PROPERTY(
        NAME_IN('system.cursor_item'), item_canvas),
        window_name));
END;
```

What does this function return?

- A. the name of the item where the cursor is located
- B. the name of the form where the cursor is located
- C. the name of the window where the cursor is located
- D. the name of the canvas where the cursor is located

Answer: C

2. Which statement about windows and blocks is true?

- A. Transaction management is block-oriented rather than window-oriented.
- B. Forms automatically navigates to an item located in an activated window.
- C. A window may contain multiple blocks, but each block can only span one window.
- D. A window can contain multiple canvases, and an item can be located on multiple canvases.

Answer: A

3. You include the calendar class in your Hotel Booking application. Which additional form level objects will you need to create to implement this reusable component fully?

- A. blocks
- B. visual attributes
- C. stacked canvas
- D. Nothing further needs to be created.

Answer: D

4. You need to create a trigger to locate the Product report on the Rpt_Server, run the report, and test the status of the report. Which three built-ins would you use to use to accomplish this task? (Choose three.)

- A. RUN_PRODUCT
- B. SET_REPORT_OBJECT_PROPERTY
- C. RUN_REPORT_OBJECT
- D. FIND_REPORT_OBJECT
- E. REPORT_OBJECT_STATUS
- F. COPY_REPORT_OBJECT_OUTPUT

Answer: CDE

5. You create a multiple form application. Which built-in must you use to invoke the form modules to enable you to programmatically control navigation between the multiple forms in your application?

- A. NEW_FORM
- B. OPEN_FORM
- C. CALL_FORM
- D. CLOSE_FORM

Answer: B

6. Which built-in would you use to test whether the CREATE TABLE command issued in the SALES form executed successfully?

- A. FORMS_DDL
- B. DO_SQL
- C. FORM_SUCCESS
- D. FORM_NOT_SUCCESS
- E. DBMS.ERROR_CODE

Answer: C

7. In the COURSE_ENROLLMENT form module, you define a master-detail relation between the COURSES_OFFERED data block and the STUDENT data block, respectively.

To implement block coordination, which statement must be true?

- A. The Enforce Primary Key property on the STUDENT block is set to Yes.
- B. The Alias property on the COURSES_OFFERED block is set to Student.
- C. The Copy Value from Item property on the foreign key item in the STUDENT block is set to the primary key item of the COURSES_OFFERED block.
- D. The Synchronize with Item property on the foreign key item in the STUDENT block is set to the primary key item of the COURSES_OFFERED block.

Answer: C

8. You need to create a data block for query operations in the RETIRED_EMPLOYEES form module. Which three data sources can you use for this block? (Choose three.)

- A. vector
- B. database view
- C. database table
- D. transactional trigger
- E. PL/SQL table of records
- F. multi-dimensional array

Answer: BCD

9. Which built-in allows you to update the screen display to reflect the information that Forms has in its

internal representation of the screen?

- A. SYNCHRONIZE
- B. UPDATE_FORM
- C. SYNCHRONIZE_FORM
- D. GET_MEMORY_DISPLAY
- E. SET_MEMORY_DISPLAY

Answer: A

10. You are creating a form that will access an Oracle8 database. On which three sources can you base a data block? (Choose three.)

- A. BFILE
- B. REF column
- C. object table
- D. column object
- E. INSTEAD-OF trigger

Answer: BCD

11. Your end users will need to change values in a REF lookup field in the form application you create. To facilitate choosing a new appropriate value, you provide them with _____.

- A. an LOV for REFS
- B. a list item for REFS
- C. a radio group for REFS
- D. a hierarchical tree for REFS

Answer: A

12. Which trigger property applies to Key triggers?

- A. Hide Keys
- B. Show Menu Keys
- C. Hide Menu Keys
- D. Display in 'Keyboard Help'
- E. Hide Keys Description

Answer: D

13. You created a custom menu for the Order Entry application. The shipping administrator has requested an additional submenu containing four items to invoke various reports. Which command type must you use to identify the parent menu item as a submenu?

- A. Menu
- B. Plus
- C. Macro

D. PL/SQL

Answer: A

14. How do you change the cursor style in your form?

- A. Open the form module property palette and set the Cursor Style property.
- B. From the Tools menu, select Preferences-->Runtime Settings.
- C. Use the GET_APPLICATION_PROPERTY and SET_APPLICATION_PROPERTY built-ins.
- D. You cannot change the cursor style.

Answer: C

15. The record group in the EMP form is populated using a SELECT statement that is constructed programmatically at runtime. Five employee records are displayed at one time, and a user chooses item two from the record group. Which built-in would you use to determine which rows were flagged in the record group?

- A. GET_GROUP_ROW_COUNT
- B. GET_GROUP_SELECTION_COUNT
- C. GET_GROUP_SELECTION
- D. FIND_GROUP
- E. FIND_COLUMN
- F. ADD_GROUP_ROW

Answer: C

16. As an alternative to setting the Visible property to No for the ORDERS_WINDOW, which built-in could you use to achieve the same result?

- A. HIDE_WINDOW
- B. CLOSE_WINDOW
- C. REPLACE_CONTENT_VIEW
- D. GET_WINDOW_PROPERTY

Answer: A

17. Which is an example of a dynamic SELECT statement?

- A. a query whose object names change during its execution
- B. a query whose object names are not known until run time
- C. a query whose bind variable values change during execution
- D. a query whose bind variable values are not known until run time

Answer: B

18. Which three objects can be components of a menu module? (Choose three.)

- A. windows
- B. parameters

- C. object groups
- D. report objects
- E. visual attributes

Answer: BCE

19. You are developing a Hotel Booking application for a travel company. The users request a wizard-style interface for this application. How could you satisfy this requirement?

- A. Reference the Object Iron packages in your form module.
- B. Write an HTML interface, and invoke it from your form module.
- C. Include the Wizard class reusable component in your application.
- D. Build a customized wizard using tab canvases and a horizontal toolbar canvas.

Answer: C

20. You established access to menu modules using roles. You have allowed the sales role to access the menu module, but prevented access to the Update menu item. Which item property would you alter to gray out the menu option for the role?

- A. Item Roles
- B. Menu Item Roles
- C. Display without Privilege
- D. Use Security
- E. Command Type

Answer: C

Testinside

Testinside.com was founded in 2002. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially [Adobe](#), [Apple](#), [Citrix](#), [Comptia](#), [EMC](#), [HP](#), [Juniper](#), [LPI](#), [Nortel](#), [Oracle](#), [SUN](#), [Vmware](#) and so on. And help you pass any IT Certification exams at the first try.
